

W/odok, Paul M, Gavin

30/7/89

(41)

Pushed the hole described above.
Down a series of pitches to land
in the streamway at the downstream
end of Cuckbett. Disappointing as we
thought we would be past Davilla.
Is the survey correct? This route
is much harder than the normal route
so could maybe be digged. The best
lead seems to be over Paddington

30/7/89 Dave H, Martin H, Fred, SGT

Photo'd in London Underground near
Paddington, + Marble Arch Pitt.

Back to camp for lunch then
on to check Egbert photo's
& tying up loose ends of
the survey as we went.
back to camp at 11-00pm

(Oh forgot also looked at passage
see next book)

(42) (vol. 1 end)

Useful Info

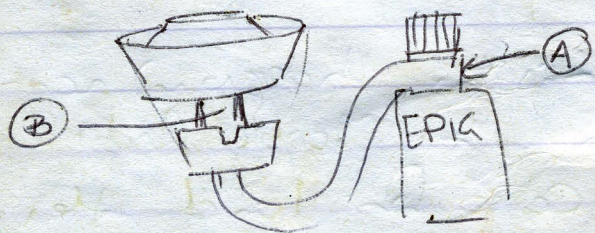

Potato - small billy - $\frac{1}{2}$ Full *

Veg stew - large billy - $\frac{1}{3}$ Full, Simmer Sries

* 1 pkt = 3 portions

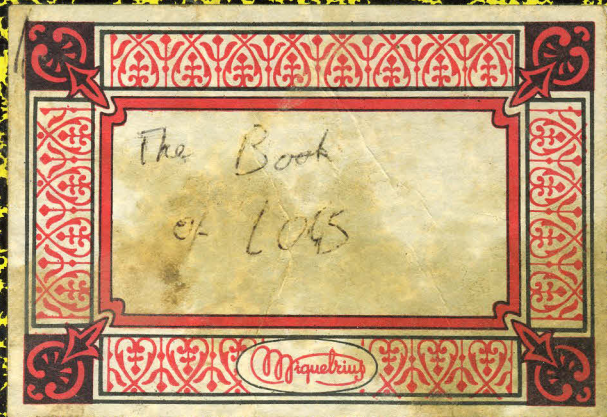

STOVES

They are very vulnerable to sand ingestion. You must not get sand in the valve which screws into the bottle (A) or the jet at the bottom of the burner (B)

BAD DIAGRAM

To solve the problem you must prick the hole near (B). You may need to pull the tube off the bottom of the burner.

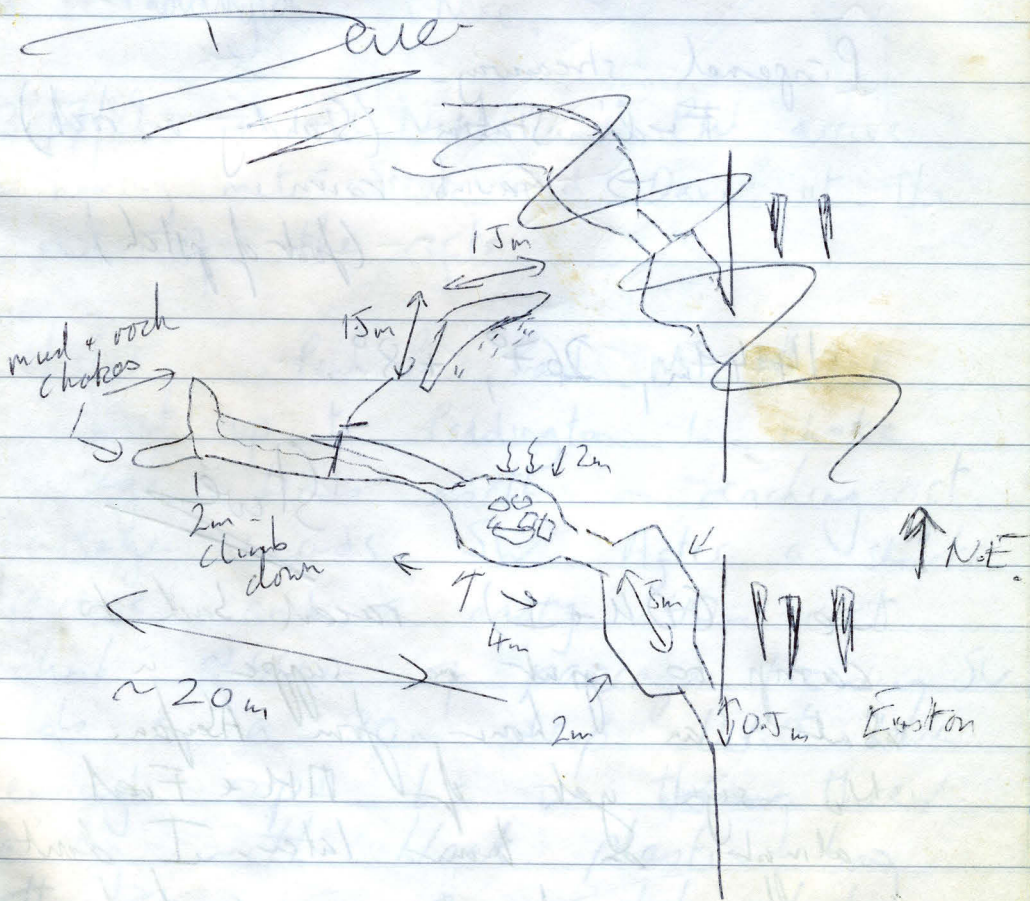

The Book
of Lods

Maquetins

30/7/89 Dave H, SER marked high level

Continued. Euston

passage of choke (marked). Vent
R (40-50m small & muddy
before chokings)

(44)

Aberfan Ante-chamber - disputed
forward bearing 245° bearing
back bearing 066°

-ie, SKR (w. wrong), Gavit & co.
were right.

Pingpon streamway

Fred's Station (Standing on rock)

→ Gavit's cairn

(Foot of pitch)

14.49m, 267° , $+8^{\circ}$.

Steve

We (DK + I) raced back to
camp to put on supper in
about an hour from Aberfan.

No sign yet of NH & Fred
almost an hour later. I don't
really want to go & find

them - -

Martin H, Fred, Wlodek, Paul M, Gavin 31/7/89

Photoed L.U from J.A Oengged
~~Zadarka~~ Zadarka way. Found nest (?)
in Paddington Choke.

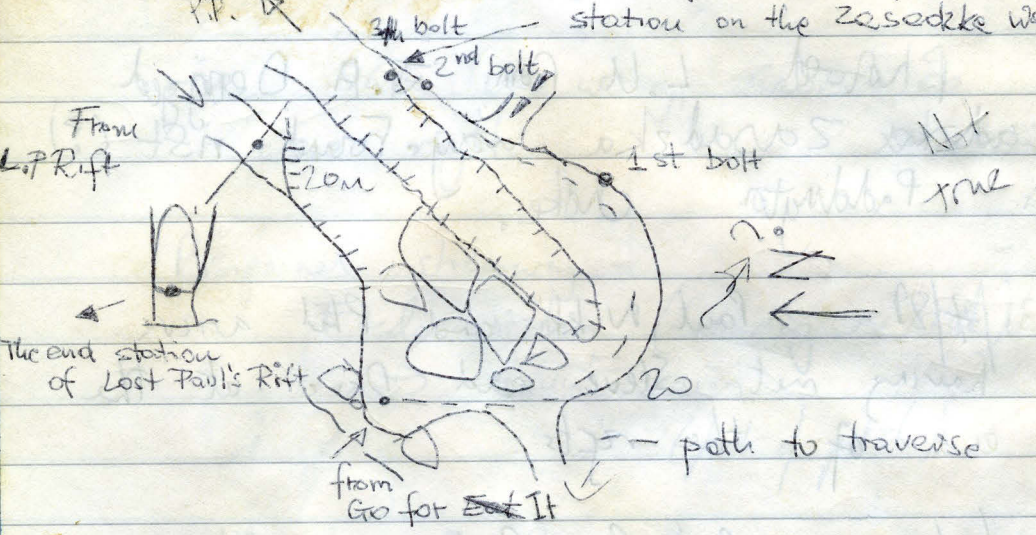

31/7/89 → Paul, Nikki and Phil arrive
having met Steve and Dave at the
end of the rifts

1/8/89 Paul B, Paul M, Wlodek
- went up to Paddington. In choke
passage leads north on reaching rift
passage heads SW. After a short
traverse and a nasty 40m rift
climb ~40m of passage. trending SW
leads to a 30m drop. Didn't have
enough rope but we ~~threw~~ threw
a tin with black plastic bag
attached down the pitch believing

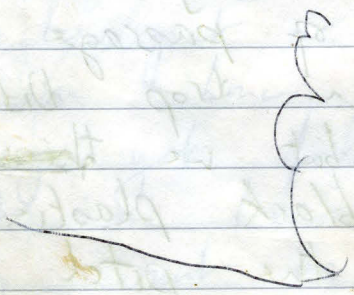

47 (46)

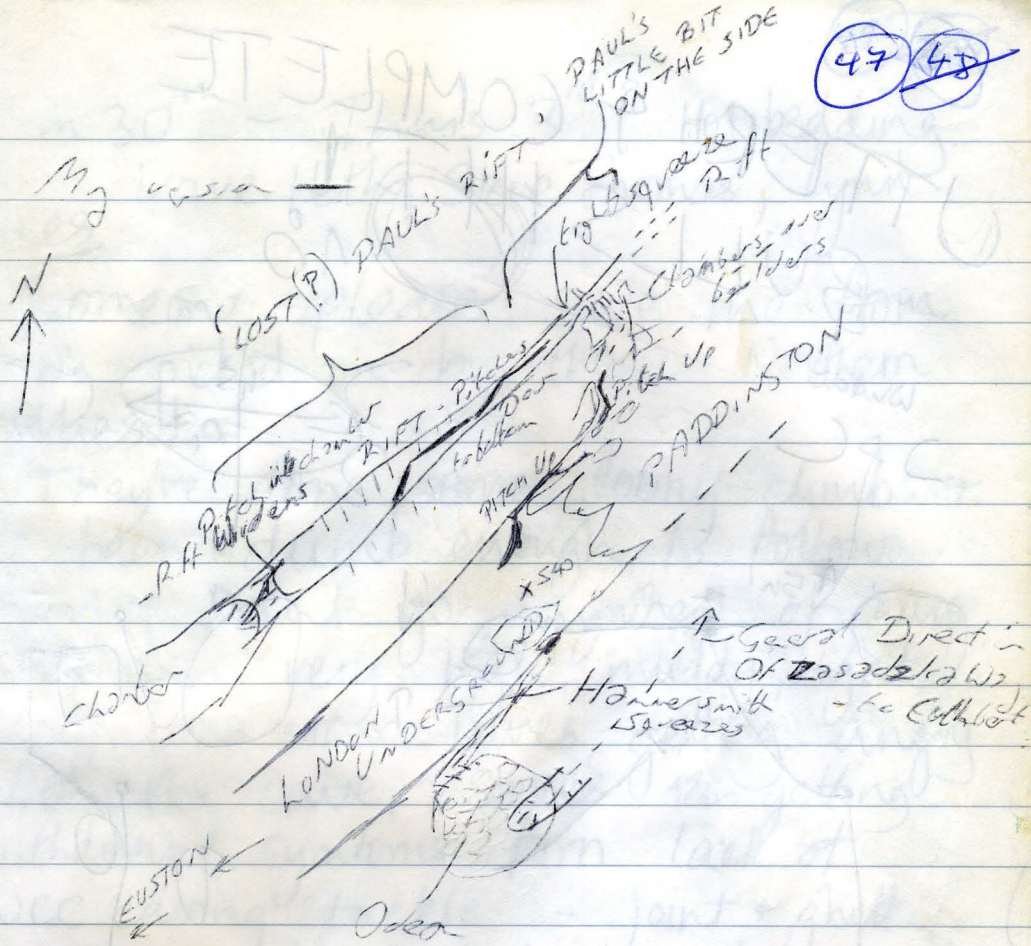

it to be Zasadzka way. Surveyed all of the passage.

Odeon - plan for closing loop station on the Zasadzka way

- If it's Odeon Chamber

To me - seems too much distance
 NW @ SE not covered

L.U. & L.P.R. both seem
 to dip S.E. ~ 80°

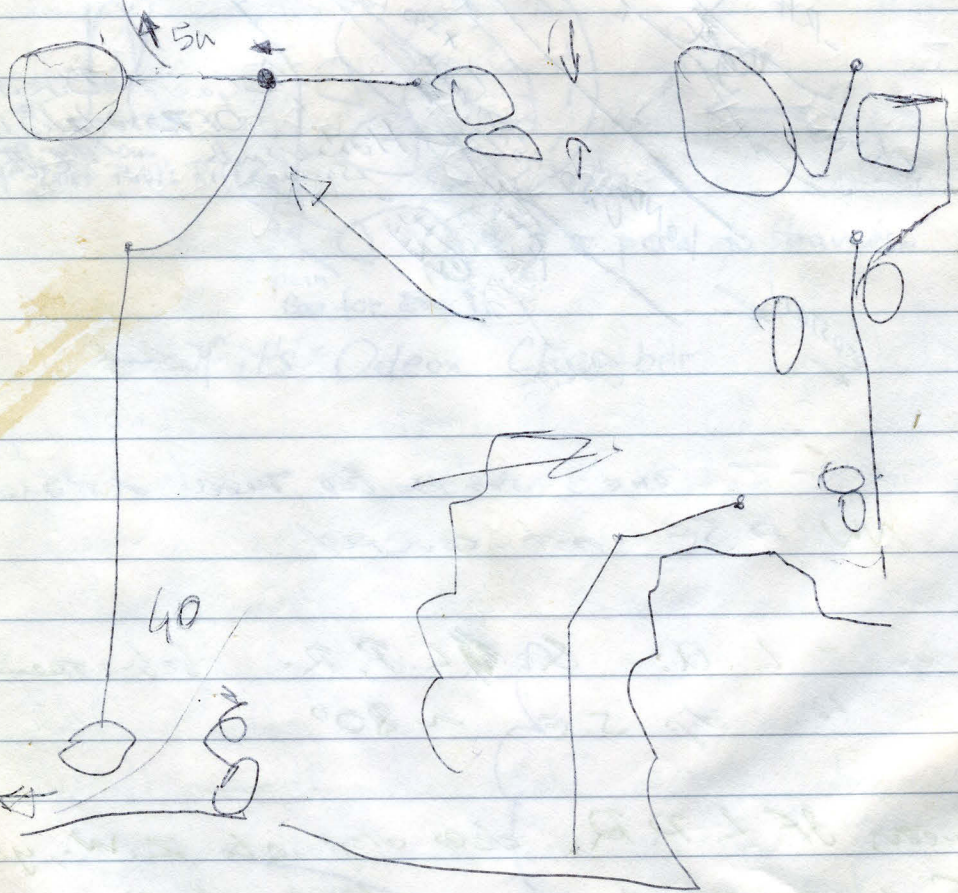

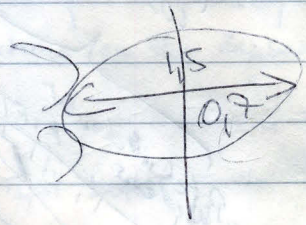

However, IF L.P.R. does drop into Z.W., you'll
 find a peack can with a plastic bag
 - the top. Had we thrown over the edge of the last
 patch

UTTER & COMPLETE
BULLS HIT 10

Window

JAC

Sun 30th - Thurs 3rd ? Hot bedding.
Dave Heth, Steve Thomas, Lynn

Tues

Someone please save me from being picked on by these Northon bullies!!

They've done some loony climbs & I've been dumb enough to follow them up. Didn't go anywhere of course other than very high, muddy, tight scrofulons etc. Dave's getting angry with the cave, Steve's ~~was~~ getting withdrawal symptoms from lack of NCC caving tackle :- joint & ghetto blaster, & I'm just being victimised. Doesn't your heart just bleed.

Anyway, this cave isn't not going for lack of trying.

50

Went 2nd Paul, Witek, Nikki

Went back to Paddington and
 Lost Paul's rft. Descended 15m into
 complicated chamber and found fir the low
 down yesterday. It is not zagan's way
 No routes out passage. There is another
 chamber to the SW which is the
 direction of the draught. Surveyed out
 and detackled route back to climbs up
 at Paddington. Came back.
